

ESCO POND S.r.l.

Ponderano, 24/09/2013

I am pleased to report that the ElectraTherm Green Machine ORC, installed at our facility in 2012, is successfully operating as a demonstration machine.

The Green Machine operates at our textile factory in Ponderano, Italy, producing additional power from the waste heat of one Diesel Engine fueled by vegetable oil, run time hours are limited because of the actual high prices of vegetable oil, but we are pleased with the machine's ability to run as needed.

Best regards,

ESCO POND SRL
